Visual Ear Tag

No built-in chip animal ear tags are commonly used for animal identification, but do not require electronic tracking capabilities and may be more physical tags, such as numbers, colors, etc. TPU material is a thermoplastic polyurethane, with wear-resistant, flexible, good weather resistance and other characteristics, suitable for outdoor use. Laser printing can be customized, color can be customized

Animal Ear Tag Applicator

Ear tag applicator is a pliers to install the ear tag on the pig, sheep, cattle and more. High quality, aluminum alloy material, shell high-grade painting material never rust, durable. Reasonable design according to the human palm, automatic lock , energy saving and easy to operate.

LD-AP01

340g

Size	240x65mm
Color	Red
Material	Aluminum alloy
Installation	Attach animal ear tags
Suitable	Female ear tag, male ear tag
Package	OPP bag, carton packing

Animal Ear Tag Remover

The ear tag removal knife is a perfect tool for animals to remove ear tags. Made of high-quality plastic, the blade is hard and sharp, making it convenient to cut ear tags. Concave handle, convenient to hold by hand. The marking knife is equipped with a hanging hole, which makes it convenient to hang and thread the rope, and it is not easy to get lost.

使用 Usage	卸掉耳标牌 Cutting ear tag
应用 Application	主要用于畜牧业 Animal husbandry

RFID Stick Reader

This hand-held machine adopts wireless recognition methods and supports electric labels of FDX-B,HDX (ISO11784/85). It has a high luminance LCD (240*320) screen, so it is clear indoors or under strong light outdoors. It can store 20,000 labels, and the users can process the labels on computer, after transferring the data to the computer via a USB data cable or wireless means. This product is stable, simple to use, and suitable for animal management, source tracing, railway patrolling, and other fields of asset management.

LDI-B11

Supported Parameters	FDX-B, HDX
Response Distance	FDX-B: 30mm Ear tag $\geq$ 30cm($\pm$ 5cm) HDX: 30mm Ear tag $\geq$ 35cm ($\pm$ 5cm)
Protocol	ISO11784/ISO11785
Reading Time	Around 100ms
Human Machine Interaction	LCD liquid crystal screen, buzzer, vibration motor
Power Supply	7.4V 1800mAH Lithium battery
Consumption	Read: 3.7W Standby: 0.5W
Capacity	20,000 data for reading; 6,000 data for comparing
Battery Life	Can read 10,000 data after fully charged
Communication Interface	USB2.0, 4.2 Bluetooth
Size	670x44x41mm

134.2khz RFID Glass Tag with Syringe

RFID implantable bio glass tag is a mini electronic device dedicated to animal identification and management, it is an electronic ID for animals that can be automatically identified among with various RFID readers. Thus, it makes such as individual screening, data statistics, whereabouts control, automatic feeding and behavior management etc., many animal research, feeding, management, investigation and other work has realized automation and information technologized, the animal tracking management ability will be greatly improved. Glass tube biological electronic tag is suitable for identification of pet dogs, working dogs and husbandry animal. It is made of biochemical medical grade materials and qualified medical grade production processes, full compliance with ISO 11784/85 international standards, it has been used in large numbers domestically and abroad, and it's all-round management to the whole process of animal growth.

UHF RFID Tag

- 1. Compliant with globally recognized standards (ISO 18000-6C/EPC Gen2)
- 2. The long-range outlier reading ability is significantly better than LF/HF labels.
- 3. Support dynamic writing and data updates.
- 4. Paper label rapid printing integration, ultra-low cost, environmentally friendly and sustainable.
- 5. Commonly used in the retail industry, inventory management, logistics tracking, library management, etc.

UHF RFID Jewelry Tag

1. Meet the latest international standards and apply to more industries and fields
2. The jewelry label uses PET material with smooth surface, waterproof and wear-resistant, and is not easy to tear.
3. The label is small and light, easy to paste, suitable for use in jewelry products.
4. RFID jewelry tags enable second-level inventory and traceability anti-counterfeiting to help enterprises reduce costs.
5. Each piece of jewelry is equipped with a unique RFID tag, and the company can accurately track the inventory.

UHF RFID Anti-metal Tag

1. Eliminate the interference of metal surfaces on electromagnetic signals through special materials and packaging.
2. Read long-distance, extraordinary non metal resistant tags on metal surfaces.
3. Surface printable, compatible with ISO 18000-6C protocol, operating frequency coverage 902-928Mhz.
4. Multiple tags can be read simultaneously (up to 50 tags per second or more) without being limited by the number of tags.
5. It has waterproof, anti-collision, and wear-resistant characteristics, suitable for industrial manufacturing, logistics transportation, etc.

HF / NFC Tag Series

- 1. The high-frequency label works at 13.56MHz. Ensure that data is transmitted only between devices in the near distance .
- 2. Support ISO 14443, ISO 15693 and other international standards, suitable for a wide range of devices .
- 3. HF RFID reading distance is moderate (0-10cm), data transmission rate is fast, and has strong anti-interference ability and security.
- 4. Can composite high-frequency inlay, RFID tags, anti metal tags, etc., can be customized with various sizes, chips, materials, etc.
- 5. Suitable for smart home control, mobile payment, access control, enterprise anti-counterfeiting traceability and other fields .

RFID Special Tag Series

- 1. UHF RFID tag working frequency is 860-960MHz, support 3-10 meters long distance identification and high-speed batch reading.
- 2. Hard labels can be applied in many industries, such as warehousing, logistics, medical record management, jewelry management, etc.
- 3. The hard label is usually packaged in a hard protective shell with pressure resistance, water resistance and high temperature resistance.
- 4. Built-in high-performance antenna, strong signal penetration and anti-interference ability, suitable for indoor or outdoor harsh environment.

LD-AC06 2.4G Active RFID Portable Base Station

Product overview

The portable Bluetooth base station adopts Bluetooth wireless communication technology, designed with high sensitivity and low power consumption technology, and has strong anti-interference ability and high-speed card reading ability. It can accurately obtain electronic tags and is mainly used for indoor tag data reception.

Parameter

Size	106*106*27mm
Working voltage	USB/5V
Operating Frequency	Bluetooth, active 2.4GHz
Working current	≤500mA
Concurrent quantity	200 above
Recognition distance	30m
Communication interface	Rj45
Waterproof Level	IP50
Housing material	ABS
Broadcast frequency	100ms~10s
Antenna orientation angle	<180°
Card reading distance	Open and undisturbed, adjustable at a distance of 30 meters
Broadcast power	-30~+4 dBm
Anti-electromagnetic interference	10V/m0.1~1000MHz AM amplitude modulated electromagnetic wave

LD-AC60 2.4G Active RFID Acousto-optic Tag With Light & Sound

Product overview

Sound and light tags can have multiple operating frequencies. 2.4GHz can recognize from a distance, making it more secure. The tag card spontaneously emits and provides feedback signals, which can be recognized by RFID remote readers without triggering.

Parameter

Size	47mm×40mm×14mm
Material	ABS+PC
Weight	23g
Package	Corrugated cardboard box (customized)
Working humidity	<95%
Operation temperature	-20 ~ 65℃
Storage temperature	-20 ~ 70℃
Waterproof level	IP54
Static current	<5uA
Working voltage	3V
Battery	CR2450 * 1 (replaceable)
Battery usage	According to usage
Collision ability	>2000PCS
Transmission Time	Proactively once every 3 seconds
Installation method	Paste and fix, tie with zip ties
Reading method	Read-only nature
Transmission power	4dBm (factory setting)
Recognized distance	30 meters visible distance
Light search function	7 colors (adjustable)
Anti disassembly alarm function	May make to order
Horn alarm function	There is 60dB
way of working	Active
125 low frequency function	May make to order

LD-AC61 2.4G Active RFID Acousto-optic Tag With Light & Sound

Features

- 1. Reading and writing speed: Compared with barcodes, it does not require straight line alignment for scanning, and has faster reading and writing speed. It can recognize multiple targets and motion.
- 2. Security: Anti tampering, encryption algorithms and authentication ensure data security, prevent link eavesdropping and data cracking, more durable.
- 3. Specialized chips, unique serial numbers, and difficult to replicate. Durable without mechanical failure, fully sealed structure resistant to harsh environments.
- 4. Tag ID number: 10 bytes;
- 5. Tag type: read-only;
- 6. Usage duration: Large battery capacity, long service life;
- 7. Waterproof grade: IP54
- 8. Reading distance: far reading distance;
- 9. Anti duplication: Advanced anti-collision technology can simultaneously recognize more than 200 tags;
- 10. High speed recognition: The maximum recognition speed can reach 60 kilometers per hour;
- 11. High anti-interference ability: no special requirements for various interference sources on site;
- 12. Anti electromagnetic interference: 10V/m0.1~1000MHz AM amplitude modulated electromagnetic waves;
- 13. Installation method: Can be carried around or placed in a car;

Parameter

Size	86mm×26mm×9.5mm
Material	ABS
Weight	18g
Working humidity	<95%
Operation temperature	-20 ~ 65℃
Storage temperature	-20 ~ 70℃

- 3. Specialized chips, unique serial numbers, and difficult to replicate. Durability without mechanical failure.
- 4. Tag ID number: 10 bytes;
- 5. Label type: read-only;
- 6. Duration of use: With a large battery capacity, it can be recharged repeatedly;
- 7. Reading distance: The reading distance is far;
- 8. Anti collision capability: Advanced anti-collision technology can simultaneously recognize more than 200 tags;
- 9. High speed recognition: The maximum recognition speed can reach 50 kilometers per hour;
- 10. High anti-interference ability: No special requirements for various interference sources on site;
- 11. Anti electromagnetic interference: 10V/m0.1~1000MHz AM amplitude modulated electromagnetic waves;
- 12. Installation method: clamp fixed items;

Inlay Series (Dry Inlay + Wet Inlay)

- 1. inlay is the core material of smart card and electronic tag. It consists of chip and antenna and is packaged in PET material .
- 2. The antenna material has copper etching and aluminum processes, and the packaging process involves the difference between dry and wet .
- 3. Dry Inlay: no back glue, secondary packaging is required; Wet Inlay: with adhesive layer, can be directly attached to the surface .
- 4. HF and UHF refer to the frequency range of Inlay's operation, which is 13.56MHz for high frequency and 860-916MHz for ultra-high frequency
- 5. HF is suitable for water-containing objects with short reading distance, while UHF is far from reading distance, suitable for logistics and retail.

RFID Wristband

- 01 Disposable Wristband
- 02 Nylon Wristband
- 03 Silicone Wristband

Disposable RFID Wristband

- 1. Leadercolor wristbands are divided into three categories: disposable wristbands, nylon wristbands and silicone wristbands
- 2. Disposable wristbands are easy to wear, easy to use, waterproof, moisture-proof, shock-proof and high temperature resistant.
- 3. Nylon wristband is composed of nylon watch band + drip card. The watch band is made of all-nylon material, beautiful and durable, easy to use.
- 4. Silicone wristband made of silicone material, there're various sizes of closed-loop wristband, adjustable tightness of the watch buckle wristband.
- 5. Widely used in campus, amusement park, bus, community access control, field work and other extremely humid environment

Size: 105x70x11mm	Size: 123x94x29mm
	

PRODUCT FEATURES (LDF-7036SRIP)

- 1. Support mainstream ISO/IEC15693, ISO14443TypeA/TypeB protocol tag (TI, PHILIPS, ST, INFINEON, FUJITSU, EM...);
- 2. Advanced tag processing algorithm,high identification rate;
- 3. Built-in TX/RX antenna with effective distance up to 100mm*;
- 4. Support Transparent Command operation①;
- 5. Low power dissipation design with single DC+12V power source needed;
- 6. Support TCP/IP and RS232 interface and provide DLL and demonstration software to facilitate development;
- 7. Provide DLL and demonstration software to facilitate development.

LF RFID Reader

LDI-A04	LDI-B11
	

INTRODUCTION

This is Long-distance ISO11784/11785 reader, This reader supporting animal ear tags using the reading distance is 45cm±10%.

PRODUCT FEATURES (LDI-A04)

- 1. Support read operations on the Em4305, S256, T5577 according to ISO11784/ISO11785;
- 2. Support ISO11784/5 Standard;
- 3. Size: 260mm x 260mm x 35mm;
- 4. Operating voltage: 15V-DC, operating current: <150mA;
- 5. UART, Rs232, RS485 Multiple interfaces can be options;
- 6. Long-distance: Read LF Animal tag more than 45cm;
- 7. High stability: can automatically adapt to the environment;
- 8. High reliability: ESD protection, anti-surge protection;
- 9. Application area: pig management, cattle management, sheep management, parking management.

UHF RFID Antenna

LDR-UA01	LDR-UA02	LDR-UA04
		
LDR-UA05	 Application: 1. Intelligent traffic management; 2. Logistics such as container management; 3. Ticketing, school attendance, asset tracking; 4. Access control, automatic weighing; 5. Animal tracking.	

RFID Parameters

Model No.	LDR-UA01
Frequency	Worldwide 840-960Mhz
Antenna Type	8dbi circularly polarized Auto-gaining antenna
Connector Type	N-female, others optional
Working Mode	Need to work with RFID reader hub
Read&Write Range	1-6m adjustable (Tag and environment dependent)
Anti-collision	Support multiple tags reading

Physical Parameters

Size	260x260x45mm
Material	ABS Waterproof
Mounting	Pole/Ceiling
Operating temperature	-10℃~+60℃
Protection level	Outdoor Ip54
Rated Wind Velocity	60m/s
Max input power	100W
Lightning protection	DC ground
Accessories	1×Bracket, 1×Connection cable
Package	1 unit/carton
